

Government Records Preservation

For Immediate Release:

January 1, 2022

HF Group, LLC, and the Government Records Preservation division, is pleased to announce that **Randy Jones** has joined the team as Sales Representative for the state of Indiana and some adjoining state's counties.

In 2022, HF Group and Boyce Systems formed a supplier-dealer relationship with Randy leading the effort. From that relationship, we were able to transition county preservation services directly to HF Group. Randy becomes our third Sales Rep, joining Rick Meader, Sales Rep, and Tim Baumgardner, Sales Manager.

"Randy loyally served Boyce's customers for over 25 years and meeting our Indiana-based county clients' preservation needs is important to us both. As our relationship with HF Group evolved and their capacity and capabilities have grown, it is a natural step to allow them to sell, fulfill, and service the preservation services business in Indiana. His transition to HF Group best serves our shared customers in the long run." said Casey Stanley, President of Boyce Systems.

Jim Heckman, Vice President of HF Group commented, *"We successfully launched our county records preservation services in 2022. As we move into 2023, we are really pleased to have Randy on board, especially for the state of Indiana, a home site of one of HF Group's two records preservation production facilities. Our sales team collectively represents a tremendous amount of experience in this market. Our county government customers can rely on their knowledge to guide preservation options and decisions."*

HF Group Government Records Preservation services include repair, restoration, de-acidification, digital reformatting, and digital print reproductions of all types of government record books. Physical treatment services are based at the company's facilities in **North Manchester, Indiana**, and **Greensboro, North Carolina**.

Our team is committed to serving not only direct government officials, recorders, and archives, but also government service providers (dealers) who have a strong history of working with state and local recorders and records managers.
