

Government Records Preservation

For Immediate Release:

March 19, 2024

HF Group, LLC, and the Government Records Preservation division, are pleased to announce the addition of Ryan Chapman to our company as Northeast Account Executive.

Ryan, from Apalachin, New York, brings significant experience in county and municipal government preservation in the states of New York, Connecticut, Pennsylvania, and New Jersey. He has surveyed over three hundred vaults, records rooms, and archives across the Northeast.

Ryan will be responsible for identifying and locating historic records at all levels of government that are in need of preservation treatment. His primary focus will include clerks, recorders, registrars, and auditors throughout the Northeast. Through the strong relationships he holds in his territory, he has gained access to records dating back to the formation of our country in Philadelphia, and some of the earliest-formed towns in and around the tri-state area.

Ryan is also an Air Force veteran who has a strong passion for history. He and his wife Kariann are parents to three children, Gabriela (17), Adalynn (9), and Weston (7).

Tim Baumgardner, GRP Sales Manager commented, *“The addition of Ryan to our growing sales team is a great step forward for our overall experience and expertise. Ryan is well known in our market, and I have had the opportunity to work with Ryan and some of his colleagues in the past. I am confident that our company could not be better represented, and we are fortunate to have him on board.”*

Jay Fairfield, President of HF Group said, *“We could not be happier about Ryan joining our team and it is our pleasure to introduce him to our employees at all locations. We are excited about the opportunity for Ryan to introduce HF Group to government professionals across the Northeast.”*

HF Group’s Government Records Preservation services include repair, restoration, de-acidification, digital reformatting, and digital print reproduction of all types of government record books. Physical treatment services are based at two of the company’s facilities in **North Manchester, Indiana, and Greensboro, North Carolina.**

Our team is committed to serving not only direct government officials, recorders, and archives, but also government service providers (dealers) who have a strong history of working with state and local recorders and records managers.
